Choubaddak.com offers you and for free the chance to get a map along with your company listing.

When you add an entry to the directory, you'll find 2 boxes, Google Latitude and Google Longitude, actually those entries are your company GPS location.

To Find your company GPS coordinates using **Google® Maps** please follow these steps:

- Go to: <http://maps.google.com/>
- Find your location, zoom in as much as possible to your location.
- Right-click on your location on the map and select "What's here?". The coordinates will automatically pop up in the search box.

- Enter those Coordinates into the form when adding your listing to our directory.
